## **Petition Sample**

We, the citizens of Storybook, petition the city to install new computers to the Belle River Library on Main Street.

At present, there are outdated machines in the west wing that frequently malfunction.

When students enter the building to work on assignments, they're met with computers that are exceedingly slow and frequently freeze. This causes a high level of stress and - worst of all - a loss of work.

If the city doesn't have the means to fund this important initiative directly, we've provided a list of non-profit organizations that look for opportunities such as this.

We demand this improvement to our students' resources before the start of the new school year on September 3, 2021.
